

Bespoke functionality

ATMOS[®] clinic and practice furnishing

Work rooms that suit you

CUSTOM WORK

Craftsmanship meets medical technology

Decades of expertise in perfection

In order to keep a medical practice or clinic facility running successfully, it takes more than just separate rooms divided up and equipped for different purposes – it also needs a design concept that includes its furniture and surfaces.

We offer furnishing for new treatment rooms, as well as partial renovations and full refits for existing practices.

It doesn't matter whether you just need a new reception desk or want your waiting room redesigned with new chairs to boot – whatever you need, we'll find the perfect solution for you.

We plan and build labs and specialist examination areas, as well as sterile and hygienic rooms. We can also outfit your consulting room with new furniture such as desk and cupboards, chairs and recliners – either designed to match your current décor or as a comprehensive, bespoke design concept.

Versatility in design with CORIAN®

Surfaces play an important role in many work areas where hygiene is an important factor. For hospitals, practices and labs alike, our combination of experience in craftsmanship and expertise in medical technology makes us the perfect choice to fulfil even the most stringent requirements, using the mineral material CORIAN®. The material is hard and non-porous. When cleaned professionally and thoroughly, it will maintain a clean, fresh aesthetic at all times. It also prevents the growth of bacteria, fungus and mould. CORIAN® – the intelligent choice for the healthcare sector.

CORIAN® can be milled, cut and thermally moulded – thus allowing you to connect several pieces without leaving any joint seams.

Your imagination is the limit! With such a wide range of design choices and almost limitless machining options, it goes without saying that we will be happy to assist you throughout the planning phase.

EVERYTHING FROM A SINGLE SOURCE

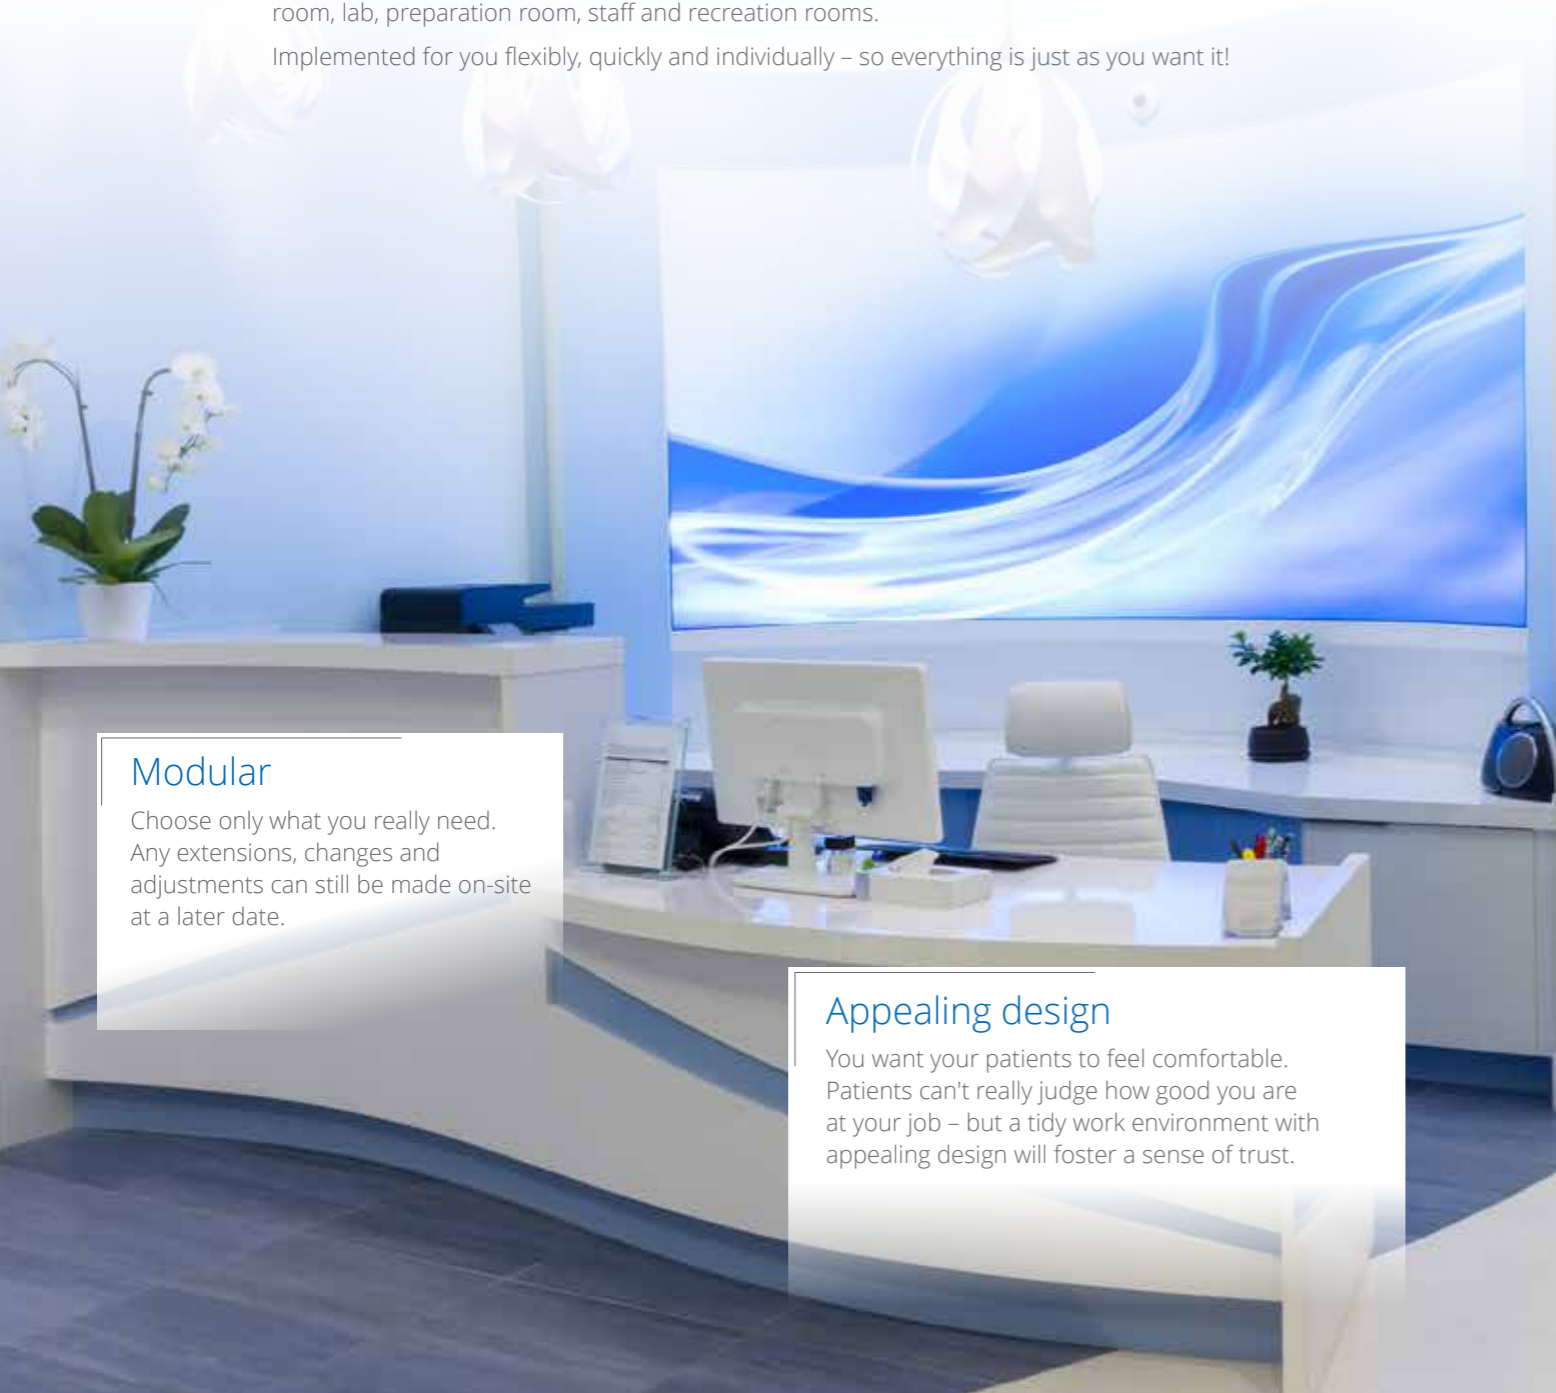

Furnishing solutions

Functional clinic and practice furnishing

Our medical workplace solutions offer the perfect harmony between the functional and aesthetic aspects of your design. Our aim is to bring your wishes to life.

The result is a combination of workflow optimisation and attractive design that will ensure both you and your patients feel at home in your facility – from the reception and the waiting room to the treatment room, lab, preparation room, staff and recreation rooms.

Implemented for you flexibly, quickly and individually – so everything is just as you want it!

Modular

Choose only what you really need. Any extensions, changes and adjustments can still be made on-site at a later date.

Appealing design

You want your patients to feel comfortable. Patients can't really judge how good you are at your job – but a tidy work environment with appealing design will foster a sense of trust.

Hygienic

Hygiene starts with the design of your facility. Storage and disposal for instruments – either disinfected or sterile, depending on their application – and seamless wash basins in labs and other service areas are just two examples of this.

Ergonomic

Our outfitting approach is based on practical experience. We will adapt the way we furnish your facility to suit your workflow, allowing you to work more efficiently.

Mobile

In certain special circumstances, mobility is required. Implementing it intelligently can help in many ways, including making cleaning easier and more thorough.

Adaptable

Our customised concepts will allow you to get the most out of even highly specialised floor plans.

OVERVIEW OF FITTING OPTIONS

CORIAN® modular instrument cabinets

Bespoke configuration

Optimising your instrument management system can save you a lot of time, allowing you to maintain strict hygiene standards even with a high turnover of patients. Our cabinets can be adapted to suit all your work habits, while an organised instrument storage system will keep your workflow both hygienic and efficient.

Worktop

- With raised rims
- With sloping rims

Servo-Drive®

Opening drawers made easy with the Servo-Drive®. Simply tap the drawer with the back of your hand, your elbow, your foot or your knee, and it will open electrically. Easy opening and gentle, quiet closing will protect your delicate instruments and endoscopes.

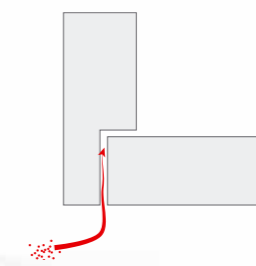

Instrument disposal

- CORIAN® surface with opening for disposed items
- Two stainless steel bins

Waste disposal

- CORIAN® surface with opening for disposed items
- Wire support for bin liners

Storage

The prepared instruments are stored in the drawers using the labyrinth joint principle, keeping them dry and free of dust.
